

To Whom it May Concern,

I am a subscriber to XM Satellite Radio and am thrilled with the quality and options of music and news they offer. I wish to voice my opinion regarding petition 04-160, the National Association of Broadcasters petition to limit XM Satellite Radio's broadcasting of local traffic and weather reports.

My opinion is that if they are so offended by what satellite radio can offer then they they better help increase the quality and options available to the public. I pay a subscription fee every month for the quality programming that local radio cannot offer me. I cannot understand the NAB's position to interfere with a subscription service.

I am asking the FCC to please deny petition 04-160.
